new perspectives on scandinavian design

Muuto is rooted in the Scandinavian design tradition characterized by enduring aesthetics, functionality, craftsmanship and an honest expression. By expanding this heritage with forward-looking materials, techniques and bold creative thinking, our ambition is to deliver new perspectives on Scandinavian design.

In fact our name, Muuto, comes from muutos, meaning new perspective in Finnish. We handpick leading contemporary designers who are strong interpreters of our philosophy and combine their talents with the passionate Muuto creative team.

You will know our design because it has muutos: objects made sublime through new perspectives, enjoyed across the world, representing the best of Scandinavian design today.

creating
spaces
that feel

just right

“When you have heightened
aesthetic experiences...
They change you.
They change your biology.
They change your mood.
They change your emotion”

—Susan Magsamen

—at home

“Neuroaesthetic research has allowed us to identify a myriad of factors that contribute to a sense of well-being: *color, form, light, the presence of nature, and tactile materials* that speak to our senses, easily applicable and combined for the optimal atmosphere at home.”

Exploring new perspectives on Scandinavian design is key to Muuto’s forward-looking, innovative designs. Intuitively knowing that design has the capacity to greatly affect the way we feel, we continue to believe in the importance of creating intentional atmospheres through a thoughtful selection of furniture, lighting, and accessories.

Intuitively, we all know the feeling of entering a room and immediately feeling at ease or stimulated. That interacting with elements of design—be it sensations of light, color, or texture—can trigger emotions and spark a dynamic interplay of neurotransmitters in our brains. This process can shape our feelings, thinking and behavior. There is more to design than meets the eye.

The Impact of Neuroaesthetics on Design and Spaces

Neuroaesthetics is about mind-body connection: a scientific discipline that explores and measures how creative expression makes an impact on us. It gives a deeper understanding of the way art, design, and architecture activate our senses and stimulate our sense of well-being. Understanding how we respond to different spaces allows us to better discern the connection between body, mind, and design.

Through our longstanding collaboration with Susan Magsamen, executive director of the International Arts + Mind Lab at Johns Hopkins University, we continuously explore how to be intentional in shaping the spaces we create.

How to Create Intentional Spaces for the Home

Neuroaesthetic research has allowed us to identify a myriad of factors that contribute to a sense of well-being. We continue to explore, experiment with and consciously incorporate these into our interiors, creating spaces that feel just right. Among them are five elements that seem to significantly affect us all: color, form, light, the presence of nature, and tactile materials that speak to our senses, easily applicable and combined for the optimal atmosphere at home.

Combining the 5 Principles

We know that COLOR deeply affects our mood in a space, helping us feel relaxed or energized. Meanwhile, we seem to be intuitively drawn to rounded FORMS rather than angular, such as the curved armrest of a lounge chair. Similarly, using TACTILE MATERIALS like a textile you like to run your fingers over and surfaces that speak to our sense of touch draws us in and creates a pleasant sensation.

Introducing NATURE to our interiors through natural elements like greenery and fresh cut flowers and materials such as wood, wool textiles, ceramics, or clay into our homes has been demonstrated to lower stress levels, promote feelings of calmness, lower our cortisol levels, and promotes well-being. Our circadian rhythm is greatly impacted by both natural and artificial LIGHT. The amount of light, the light temperature, and when we are exposed to light, among other things, all play into whether we feel at ease or more alert and focused. For instance, a task light on your home desk can help you stay focused and productive by providing bright, concentrated illumination for your work area. Meanwhile, ambient lighting fosters tranquility and relaxation in our bedroom, enveloping the space in a gentle, soothing glow.

We hope our perspectives on Scandinavian design will inspire you to reflect on your surroundings. As you browse through this catalog, let our pictures and words inspire you—and encourage you to create spaces that feel just right for you. •

inside with —eve wilson, *Melbourne*

Eve Wilson is a Melbourne-based photographer who captures interiors, food, portraits, and places with an organic and intuitive curiosity, bringing a clean, crisp warmth to every shot. She lives in Cremorne, Melbourne, with her family, in a home which presents as a tiny traditional workers' cottage but is backed by a light-filled, modernist-inspired extension.

Midst Table Ø120
Cover Side Chair
Corky Carafe & Glasses

Points of view are essential to this house, which looks very different depending on how you come at it. From the street, it appears to be little more than a tiny, traditional workers cottage, just over four meters wide. But peek down the laneway and you'll see a mass of pink breeze blocks, vines entwined through them, flowers spilling out over glass, wood, and concrete. "It's quite spectacular," Eve concedes.

Inside, a palette of warm greens, and browns delineates its spaces, marking a passage from the old to the new. At the center, a glass-walled corridor connects the two, while a small green internal courtyard injects a sense of calm that

permeates the whole building. It's an easeful, elegant, and grounded home to the photographer, her husband Jon, and their two young daughters, Elliot, and June. Pleasingly for Eve, it offers up a new view almost every day.

Tell me about the home you've built

It's one of two tiny cottages, and we started living next door. We always eyed it, because it has a north-facing laneway, which is really good for Melbourne's northern light. When finally, we were lucky enough to get the opportunity to buy it, it hadn't been touched since the 1950s.

Can you walk me through it?

When you enter the house, you start in the oldest space. That's still quite traditionally built, so it's still got the cornices, the lighting roses, and it's all in a palette of warm off-whites. But as you move through it, you come to greens—these tastes of the new section. There are two bedrooms, a bathroom, and my study, which are all in the old building. Essentially the two buildings are joined together by a walkway. There's a large window to one side, and the tiniest little green courtyard which takes you down into the new space, all concrete, wood, greens, and the pink exterior. That's where you get all the texture and a completely different warmth.

How did you choose Studio Bright to design it?

The site is only 4.27 meters wide, so I spent a long time looking for an architect who would be excited to do something innovative with this footprint. We have two kids and a dog, so we needed enough space for everyone to fit. The house was so tiny that it required personality, creativity—not just an open plan with a white box on the back. Studio Bright had some interesting ideas right off the bat; the house they first designed for us is not too different from where we ended up.

Why was the courtyard so important?

Cremorne, the suburb we live in, is a big urban jungle: it's all warehouses and concrete, office spaces, tiny blocks. We wanted to make sure that we could always look out onto the green. It's like a little oasis out there—it's very calming.

Linear Steel Bench

Nerd Counter Stool
Ridge Vase

“One of the things I love the most is when we're all using different spaces ... Because of the courtyard, we can see through to where they are, and vice versa. There's this really nice connection; everyone's doing something different, but you still feel like you're all together.”

Where do you spend the most time as a family at home?

I made sure we had as big a kitchen table as we could. I wanted to be able to do a few things there at once—I'll read the paper with a coffee while the kids are drawing. There's music going, and if they're lucky someone's made pancakes. We spend a bit of time around that table. But actually, one of the things I love the most is when we're all using different spaces. The kids might be watching a movie or playing in the lounge room, while Jonny and I are sitting at the table, but because of the courtyard, we can see through to where they are, and vice versa. There's this really nice connection; everyone's doing something different, but you still feel like you're all together.

You also have a lot of artwork dotted throughout.

We've got quite a lot of little ceramics, vases, and little sculptures that I've collected throughout my career. When I was younger, I used to spend a lot of time photographing ceramicists and artists and bought a lot of pieces from people I came across. I also have some nice new things I picked up in Japan this year. It's an ever-evolving collection. •

our sustainable perspectives

At Muuto, we aim to take responsibility for our operations and reflect on the choices we make and how our priorities affect the well-being of people and the environment. From the materials we select to the partners we work with, the independent institutes we test and certify our products through, and all the way down to our packaging. Our approach is based on knowledge and staying curious. With each new advancement in the field and as new research emerges, we keep searching for new perspectives on sustainability across all our operations. *Listening. Learning. And improving.*

It Starts With Enduring Designs

Long-lasting products—As a design-driven company, we want our designs to be appealing now—and in the future. Rooted in Scandinavian heritage, we craft timeless designs meant for passing down through generations.

Continuous testing is at the core of our development processes to keep the quality of our product high. For high levels of strength and stability, our products are certified by independent institutes that are well-respected authorities in the industry—following industry standards like the European Standard EN and the North American standard ANSI/BIFMA. Together, these industry standards assure that our designs are durable.

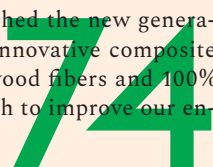

All of Muuto's BIFMA-tested designs are covered by a 5-year warranty alongside a 3-year warranty on all other products.

Reflecting On Materials

Conscious designs—Whenever we develop a new product or improve existing ones with our designers, we reflect on its impact on your health, your surroundings, and the environment.

We continuously seek new perspectives and work with the best in our industry to learn about new techniques and materials. The search for the right materials is an integral part of our design process, and we put great importance on all the materials that comprise a design and their life cycle.

As part of this journey, we launched the new generation of Fiber Chairs made with an innovative composite of FSC™-certified (FSC-CO28824) wood fibers and 100% recycled plastic, designed with a wish to improve our environmental impact.

Fiber Side Chair Tube Base p. 83
Soft Side Table p. 108
Sketch Toolbox p. 141
Dots Wood Coat Hooks p. 137

The Air We Breathe Indoor

Healthier indoor climates—Even in indoor environments, where we spend so much of our time, the air quality is vital to our sense of well-being. In any space and often impossible to see, chemicals are emitted into the air. These emissions come from all kinds of objects in our everyday lives. The type of emissions that can have an adverse effect on our health contain Volatile Organic Compounds (VOCs). In fact, the majority of VOCs can be found at home—in certain types of soaps, perfume and cosmetics, cleaning products and disinfectants, fuel, paint, plastic and the like.

At Muuto, we want our furniture to enhance your surroundings, while at the same time, creating healthier indoor climates. That's why we go to great lengths to have our furniture tested to secure low emitting products. So far, the vast majority of our furniture collection is VOC tested.

Reasons To Feel Reassured

Certificates & Eco labels—There are numerous types of labels and certificates, and we have chosen the ones most relevant to you — and our portfolio of products. Several of our designs have the following certifications and labels:

The EU Ecolabel Certification: This renowned certification is well-respected worldwide as it identifies products having a reduced environmental impact spanning a product's total lifecycle — from raw material to disposal.

Declare Red List free label: A platform based on transparency that lets you see the origins and lifecycle of a product.

GreenTag Level C-certification: Recognized worldwide as a trusted, independent eco-label certification, the Global GreenTag was established to empower you, as a consumer, to confidently choose designs founded with sustainable initiatives

within a wide variety of parameters—from minimizing hazardous substances, wood from sustainable forestry and durability.

FSC™-certification (FSC-C028824): The Forest Stewardship Council™ (FSC) aims to ensure that forests are managed in an environmentally responsible manner that preserves the natural surroundings while supporting the local community. Look for our FSC® -certified products.

Our Work Internally

Our operation—We always consider how our decisions will affect the lives of those around us. That also includes evaluating our internal operations.

Our Danish HQ, offices and warehouses are running on 100% renewable energy through green certificates. A move that lowers our overall carbon footprint. It's an initiative we are in the process of incorporating in all our Muuto showrooms and stores around the world.

The Danish company Målbar offers a screening tool that lets us measure our CO₂e-emission per product. By tracking a product's components and their origins it's possible to calculate the total CO₂e-emission of a product. By using Målbar for tracking emissions we are able to learn and improve our operations by taking informed and well-considered choices about the products we bring to the market.

A Shared Responsibility

Our suppliers—As we aim to take responsibility for our operations, we expect and demand the same from our suppliers. In striving to ensure that our designs are safely produced by skilled workers who operate under safe and healthy conditions, we have all our manufacturers sign our Code of Conduct.

As a member of the United Nations Global Compact, our Code of Conduct is aligned with the UN Global Compact principles within human rights, labour, environment, and anti-corruption. For us, it's essential that our suppliers share the same mindset when it comes to socially responsible practices.

Our Path Forward

Our ambitions for the future reflect a humble yet committed approach to what lies ahead and how we get there. Learn more about our sustainability perspectives and explore the goals that continue to guide our work now and in the future at muuto.com/sustainability

Fiber Stool – Tube Base
by Iskos-Berlin

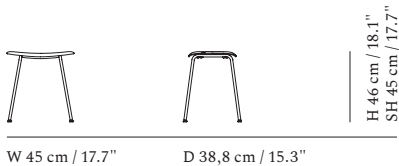

Material
Shell without upholstery: 100% recycled plastic reinforced with strength-improving additives and mixed with up to 25% FSC™-certified wood fibers. Shell with upholstery: 100% recycled plastic reinforced with strength-improving additives and mixed with up to 25% wood fibers. Shell can be fully upholstered with textile, imitation leather, or leather. Leather from selected premium leather suppliers. Due to the partly natural material of the shell, slight color variations can occur. Base in powder-coated steel. The Fiber Series without upholstery is EU Ecolabel Certified.

Additional Information
This product is Made-To-Order. Explore all Made-To-Order options on muuto.com/products.

Made with recycled materials

Ready-To-Ship Options	
Black	

70/70 Outdoor Table
by TAF Studio

Material
Tabletop in FSC™-certified Sapele Mahogany, a durable hardwood. Initially, the tabletop will have a warm glow. If left as is, untreated, the wood will patinate over time and turn a silver shade of grey. Treat the wood with oil for a deeper warm glow and a more reddish expression. Base made from aluminum with a weather-resistant, UV-resistant powder-coated finish. Plastic glides. All materials suitable for outdoor use.

Additional Information
Sapele Mahogany is a natural material where color and wood grain variation can occur from one piece of wood to another. Over time, small cracks at the tip of the wooden planks can occur due to the impact of weather. Furthermore, the wooden planks can, over time, warp a little resulting in a slight height difference between the wooden planks. When exposed to direct sunlight please note that objects placed on the table for a longer period of time can lead to color differences in the tabletop, this will however even itself out over time if the object is removed. Protective cover available.
